INSURANCE BENEFIT DETERMINATION TABLE
FOR OTHER DISEASES AND SURGERIES

This Annex 4 to Accident Insurance Regulations approved by the resolution of the Board of UADB Compensa Vienna Insurance Group on 4 September 2018 constitutes an integral part of the Regulations and is issued in compliance with and subject to the requirements of the legislation of the Republic of Lithuania.

Insurance options for other diseases
1. Botulism;
2. Salmonellosis, trichinellosis, legionellosis;
3. Gas gangrene;
4. Ebola virus;
5. Meningococcal infection; Diagnosed form of purulent meningococcal meningitis, meningoencephalitis, meningococcal sepsis (meningococcemia) or fulminant meningococcal infection.
6. Diphtheria;
7. Posttraumatic osteomyelitis;
9. Perforated peptic ulcer – complication of peptic ulcer involving perforation of ulcerous wall and spillage of stomach or intestinal content to the abdominal cavity causing peritonitis.

Prerequisites for paragraphs 1 to 6: The diagnosis is made and at least 2 days’ treatment is undergone in hospital. The disease is confirmed by a medical certificate issued by an infectologist and supported with appropriate diagnostic / microbiological / virusological / serological tests.

Prerequisites for paragraphs 1 to 9. Insurance benefit is payable to the Insured Person only once during the policy period irrespective of the number of occurrences covered by Other Disease Insurance chosen by the Insured Person.

If the Insured Person’s disease is recognised as risk covered (event insured), the sum insured chosen for Other Diseases shall be paid in full. Insurance benefit is payable at least 30 days after commencement of the policy. This provision shall not apply when coverage under insurance option Other Diseases and Surgeries is continued in the renewed policy.
