

Pricing Actuary

Your main job duties will be:

- Develop and maintain pricing models for new and existing products
- Analyze large datasets to identify trends and suggest pricing changes
- Prepare reports and presentations to communicate pricing strategies and results
- Monitor and assess market conditions to ensure competitive pricing

We expect you have:

- Bachelor's degree in Actuarial Science, Mathematics, Statistics, or related field
- Strong analytical skills and proficiency in statistical software (e.g., R, Python, SAS)
- Excellent communication skills and ability to present complex data clearly and create a background story for it
- Willing and able to take ownership of processes and make decisions based on data
- +2 years experience in handling any kind of data in any industry
- Any experience in pricing or actuarial analysis within the insurance industry would be considered as advantage. As well as experience with pricing tools (e.g. WTW Emblem, Radar or similar)

What We Offer:

- Opportunities for professional development and advancement
- Collaborative and inclusive work environment
- Health and well-being – additional health insurance
- Discounts for both companies' and partners' services
- 1 free day for social activities and volunteering
- 2 additional paid rest days per year
- Additional benefits

Salary: 2500 - 4000 €/month. gross.
